WHAT'S ALL THE HOOPLA?

Can you imagine being able to analyze your own legal case and take it through the legal system on your own – or at least have enough of an understanding to intelligently partner with a lawyer? That's what this website is about. It all starts with Lawsuit Analyzer®, a one-of-a-kind legal operating system.

WOW, REALLY?

Lawsuit Analyzer® is a powerful interactive program that takes your dispute through the elements of legal liability assigning a point system to determine feasibility. It has been coined a streamlined course in legal charting because its explorative queries define your case in legal terms, identify the legal options available and assess case viability.

THEN WHAT?

Once you complete Lawsuit Analyzer®, you will be taken to the appropriate forum for your dispute and guided through your legal process.
